

**First words for Nuuchahnulth\***  
compiled by Adam Werle  
2018–2020, Somass Valley Language Circle

**§1. Overview.** In this work, I recommend one thousand Nuuchahnulth words as among the first that ought to be learned. They are divided into five blocks of two hundred words each, and then into twelve categories. The list is available in seven dialect versions.

In this brief introduction, I acknowledge some of my collaborators, and offer some explanation concerning glosses and abbreviations. For further background, see the accompanying document *A report on first words*.<sup>1</sup>

**§2. Acknowledgements.** While these words come from many sources, new data come from the following elders, some of whom checked thousands of words.

Moira Barney, Linsey Haggard, David Inman, Michelle James, Henry Kammler, Marie Lavoie Jack, Vi Mundy, Samantha Touchie, and Victoria Wells greatly facilitated the research. Many others too numerous to acknowledge adequately here contributed in other ways, regarding which please see *A report on First words*.

**§3. Glosses.** *First words* is a wordlist, not a dictionary. Whereas words in a dictionary are presented in all of their forms, with detailed definitions, words in this list are given in one form, and get just a brief gloss.

On the other hand, the glosses include some valuable grammatical information. In the following sections, I explain the conventions by which glosses convey concepts of number, gender, pointer distance, aspect, and transitivity.

**§4. Number.** Like English, Nuuchahnulth distinguishes two numbers, *singular* and *plural*. But unlike English, it has plural adjectives and verbs, as well as nouns.

Where possible, I gloss Nuuchahnulth plurals using English plurals, as in *nuučyuu* ‘mountains’. But where there is no plural form in English, the abbreviation *pl* indicates that the word is plural, as in *?a?iiḥ* ‘big (pl)’.

- N *nuučyuu*..... mountains
- B *?e?iiḥ*, CTQ *?a?iiḥ*..... big (pl)

**§5. Gender.** Some words having to do with feelings or private body parts have different *feminine* and *masculine*

forms, for describing females and males, respectively. These are indicated by the abbreviations *f*, *m*.

- B ʔuuqsuuqʰ .....happy (f)
- B ʔuuʃaqʰ .....happy (m)

**§6. Pointers.** Pointers are words that say how far away something is. Whereas English distinguishes only two degrees of pointer distance (*this*, *that*), Nuuchahnulth has four, which I abbreviate as *d1*, *d2*, *d3*, *d4*.

- N ʔahkuu .....d1 this
- N ʔahnii .....d2 that (by you)
- B yaal, CM haayahi .....d3 that
- B yeeł, CM huuyahi .....d4 that (far)

**§7. Aspect.** Nuuchahnulth is rich in *aspects*. Aspect is different from *tense*. Whereas tense has to do with whether an event happens in the past, present, or future, aspect has to do with the shape of events in time, and how smaller events fit into larger events.

Most Nuuchahnulth aspects are *imperfective*, meaning that they describe open-ended events. These include the continuous, repetitive, ongoing, and off-and-on aspects. Only the complete aspect is *perfective*, meaning that it describes an entire event, with a beginning and an end.

Although it is difficult to translate Nuuchahnulth aspects into English, I gloss perfective verbs with plain forms (*say*), and imperfectives with *-ing* forms (*saying*).

- N waa ..... say it
- N wawaa ..... saying it

**§8. Transitivity.** *Intransitive* verbs describe an action with just one participant (a *subject*), while *transitive* verbs also imply an *object*—that is, something that is done to. I gloss transitive verbs and glue words using the word *it*.

- N haʔuk ..... eating
- BL ʔuʔiis, AHTQ ʔuʔiic ..... eating, drinking it

**§9. Abbreviations.** Below is a list of abbreviations used in *First words*. Some indicate which dialect a particular word or gloss pertains to. Others have to do with grammatical concepts, or with the quality of the data.
